CashJournal — Complete Application Audit & Feature Reference (v3.0)

Exhaustive architectural, mathematical, UI/UX, localization, OTA update, and security audit of the native Android codebase through Phase 25 (v1.0.28-dev • Updated 2026-10-17 13:25 UTC+07:00).

Audit Revision v3.0 (2026-10-17 13:25 UTC+07:00): Updates Audit v1.0 (v1.0.14-dev) and Audit v2.0 (v1.0.18-dev) to cover all features and architectural expansions through Phase 25 (v1.0.28-dev): Room v2->v4 migrations (AccountType, BudgetMode, budgetPercent), Capital Burn-Rate Survival Runway, 42-institution BrandRegistry + 16 swatches + custom #RRGGBB picker, Live Thousands Separator, Liquid Floating Status Ring Island, Thumb-Zone Floating Action Dock, unified EditAccountSheet, GitHub OTA In-App Update System with Cobalt Breathing Halo, and 14 JUnit4 test suites (91 unit tests — 100% PASS).

1. Chronological Audit & Engineering Time Log (UTC+07:00)

Timestamp (+07:00)	Version / Commit	Phase / Milestone	Summary of Changes & Audit Events
2026-10-15 22:00	d08e35a (v1.0.9)	Phase 8 Stabilization	Fixed onboarding permission launcher crash (fragment-ktx:1.8.1), clarified storage sandbox, refined 4-dot signal cluster.
2026-10-15 23:17	54d66d5 (v1.0.10)	Brand Identity	Integrated official CashJournal Logo v1 across adaptive launcher icons and in-app branding.
2026-10-16 12:52	91f3803 (v1.0.11-dev)	Sensory & i18n	Bilingual localization groundwork, knock/shake detector calibration, and audio chime synthesis.
2026-10-16 13:20	337ba09 (v1.0.12-dev)	Lock & Layout	Calibrated text hierarchy, layout geometry, 15s background auto-lock lifecycle, and wave mask performance.
2026-10-16 14:09	f1ce18c	Sub-Phase 9A	Room v1->v2 migration (initialBalance), zero-drift SQL derivation, backdating, full CRUD, and balance reconciliation.
2026-10-16 14:22	10b8967	Sub-Phase 9B	Versioned JSON backup export & atomic restore via Storage Access Framework (BackupManager).
2026-10-16 14:49	10c5ec1 (v1.0.13-dev)	Sub-Phase 9C	Custom payday cycle start day (1..28), expanded 12 preset categories, and manual category picker modal.
2026-10-16 15:43	28eaece (v1.0.14-dev)	Pre-Audit Baseline	Synchronized BuildConfig.VERSION_NAME display in Settings.
2026-10-16 15:54	v1.0.14-dev	Audit Report v1.0	Initial full-codebase audit completed. Identified 16 issues (1 Critical, 4 High, 5 Medium, 6 Low).
2026-10-16 16:21	7bb6203	Phase 10 Remediation	Fixed CRITICAL-1 (initialBalance currency conversion), HIGH-1 (live selectedAccount), HIGH-2 (world currency sync), HIGH-4 (cycle startingSpent), LOW-5 (New Year & DST math).
2026-10-16 16:31	5dcca0d	Phase 11 Remediation	Fixed HIGH-3 (weather Off hides widget), MED-1 (word-boundary regex \b in Category), MED-2 (buffered budget slider), MED-3 (SALARY picker & category/accent preservation).
2026-10-16 17:08	7259a0b (v1.0.15-dev)	Phase 12 Remediation	Fixed MED-4 (10,000-round salted SHA-256 PIN + PinSecurityTest), MED-5 (full ID localization), LOW-1 (18-pref backup), LOW-2 (DailyReminderScheduler 20:00), LOW-3/4/6.
2026-10-16 17:49	3edae55 (v1.0.16-dev)	Phase 13 Polish	Added isPreferencesLoaded cold-start gate (eliminating Frame-0 onboarding flash) and centered spring morph between Status Ring and Back Button.
2026-10-16 18:37	19ff083 (v1.0.17-dev)	Phase 14 Features	Added sticky immersive fullscreen, interactive PhoneSilhouettePreview in Onboarding Step 7, auto-triggered ReleaseNotesSheet, and reactive tooltip localization.
2026-10-16 19:31	2c112d3 (v1.0.18-dev)	Phase 15 Polish	Fixed AccountDetail back button closure, 2-row balance card + auto-scaling MaskedAmount, natural EN/ID copywriting overhaul, 1:2 phone silhouette (118x236dp), inline knock sensitivity.
2026-10-16 19:42	v1.0.18-dev	Audit Report v2.0	Post-Phase-15 re-audit completed. Verified 16/16 initial findings resolved and 10/10 JUnit test suites passing.

Timestamp (+07:00)	Version / Commit	Phase / Milestone	Summary of Changes & Audit Events
2026-10-16 20:43	95927db (v1.0.19-dev)	Phase 16 OTA & Types	Added AccountType (Room v2->v3 MIGRATION_2_3), EditAccountSheet, GitHub OTA In-App Update System (AppUpdateService, UpdateSheet, FileProvider), and zero-latency background privacy veil.
2026-10-16 21:01	7c46501 (v1.0.20-dev)	Phase 16 Bump	Synchronized versionCode 13 / versionName 1.0.20-dev for OTA verification.
2026-10-16 21:20	3566a10 (v1.0.21-dev)	Phase 17 Hardening	Added AppVersionProvider (PackageManager query), locked ModalBottomSheet guard, and 60s isInstallingUpdate grace window with OEM installer URI grants.
2026-10-16 21:41	321e31f (v1.0.22-dev)	Phase 18 Hygiene	Added cleanStaleUpdateApks() and purgeOtherUpdateApks() in AppUpdateService to automatically reclaim cache storage.
2026-10-16 21:55	a8e7b54	Phase 19 Docs	Added Play-Store-style README.md and MIT LICENSE.
2026-10-17 09:57	1acd4e0 (v1.0.23-dev)	Phase 20 Brands	Added BrandRegistry (42 Indonesian & global banks/e-wallets), 16 curated color swatches, CustomHexColorDialog (#RRGGBB), and radial color haze on account cards.
2026-10-17 10:36	eb01527 (v1.0.24-dev)	Phase 21 Runway	Upgraded Room v3->v4 (MIGRATION_3_4) with BudgetMode (FIXED_NOMINAL vs PERCENTAGE_OF_FUNDS), budgetPercent, and Capital Burn-Rate Survival Runway.
2026-10-17 11:13	0ea309b (v1.0.25-dev)	Phase 22 UX & FX	Expanded % of Total Funds slider to 1%..100%, widened Dashboard carousel cards (138dp), added ThousandsSeparatorVisualTransformation, and anchored FX to /v6/latest/USD.
2026-10-17 11:46	859d244 (v1.0.26-dev)	Phase 23 Safeguards	Added disk-aware ReadyToInstall promotion, 1-tap update sheet from glowing Settings icon, and non-destructive onboarding replay safeguards.
2026-10-17 12:25	74440da (v1.0.27-dev)	Phase 24 Island & Dock	Engineered detached Liquid Floating Status Ring Island on nested screens, Thumb-Zone Floating Action Dock on AccountsScreen, unified EditAccountSheet, App Updates card, and louder USAGE_MEDIA chimes.
2026-10-17 13:13	72793a8 (v1.0.28-dev)	Phase 25 Halo & Notes	Unified Liquid Status Island width (54dp), added Cobalt Breathing & Ripple Update Halo on Settings tab, added Android 11+ installer <queries>, and curated bilingual ReleaseNotesSheet.
2026-10-17 13:25	v1.0.28-dev	Audit Report v3.0	Comprehensive re-audit through Phase 25 completed. All 14 JUnit4 test suites (91 unit tests) verified passing.

2. Executive Summary & Architectural Overview

CashJournal (app.cashjournal, current build v1.0.28-dev, versionCode = 21) is a native, offline-first personal finance and cash-flow application for Android (minSdk 26 through targetSdk 34). Built with Kotlin 2.0, Jetpack Compose, Room SQLite v4, Preferences DataStore, Kotlinx Serialization, OkHttp 4.12, and Phosphor Icons, the app is engineered around five non-negotiable pillars:

- 100% Free & Keyless: Zero paid libraries, zero user accounts, and zero API keys (Open-Meteo, ExchangeRate-API Open Access /v6/latest/USD, and GitHub Releases API).
- 100% Local & Private: All financial records reside in the internal app sandbox (allowBackup="false" + XML exclusion rules). User-controlled encrypted backups export/import via Android's Storage Access Framework (BackupManager v2).
- Zero-Drift Mathematical Integrity: Currency values stored as 64-bit integer minor units (Long); balances derived via SQL initialBalance + SUM(inflows) - SUM(outflows).
- Dual-Layer Network Lockdown: Both network_security_config.xml and HostAllowlistInterceptor restrict HTTPS traffic to exactly 6 hosts (3 weather/FX hosts + 3 GitHub OTA hosts).
- Ergonomic One-Handed UI & Sensory Feedback: Detached 54.dp Liquid Floating Status Ring Island, Thumb-Zone Floating Action Dock, Cobalt Breathing & Ripple Update Halo, accelerometer knock/shake side-swap (ShakeDetector), 44.1kHz PCM chimes on USAGE_MEDIA (ChimeGenerator), and GPU-rendered account blobs (AmbientField).

3. Complete Feature & Functional Reference (v1.0.28-dev)

3.1 Entry Point, Privacy Veil, 60s OTA Grace Window & Lifecycle (MainActivity.kt)

- Cold-Start Initialization Gate: Holds a clean Slate100 surface on Frame 0 until state.isPreferencesLoaded is true, eliminating any flash of OnboardingScreen before DataStore finishes reading.

- Zero-Latency Background Privacy Veil: Immediately triggers onAppBackgrounded() in ON_STOP to veil all sensitive content behind AppLockScreen (preventing Android Recents task switcher snapshots even when Screen Privacy is off), while deferring the biometric prompt until the user returns after >=15s (autoPromptBiometrics = isAppLocked && !isVeiled).
- 60-Second OTA Installer Grace Window: Sets isInstallingUpdate = true for 60s when launching the system package installer so switching to the OS installer never locks the user out mid-upgrade.
- Locked Modal Sheet Guard: Wraps the entire ModalBottomSheet block in if (!isLocked) inside MainAppScaffold.kt so an open bottom sheet cannot render above AppLockScreen.
- Runtime Version Resolution & Auto What's New: Queries AppVersionProvider.getVersionName(context) from PackageManager and automatically presents ReleaseNotesSheet once per version upgrade.

3.2 First-Run & Replayable Onboarding Flow (OnboardingScreen.kt — 8 Steps)

Step	Title	Functional Behavior, Controls & Replay Safeguards (v1.0.28-dev)
Step 1	Welcome	Displays official squircle emblem and 3 privacy guarantee tiles (No account, Stays on phone, Nothing uploaded). In replay mode, adds a top-right X cancel button and hardware BackHandler to exit without altering data.
Step 2	Language	Instant switch between English and Bahasa Indonesia with 250ms crossfade.
Step 3	Region & Currency	Searchable Country/Currency list with vector CountryFlag icons and currency code badges (IDR, USD, EUR, GBP, SGD, JPY, AUD, MYR).
Step 4	Name	Optional 40-character name input with live SpaceGrotesk counter (N/40) and Skip action.
Step 5	Weather Privacy	Choose Approximate Location (~1 km rounded), Search City (8 popular city chips + custom query), or Not Now.
Step 6	Permissions	Interactive runtime permission cards for Coarse Location and Notifications (API 33+), plus Device Sandbox storage transparency card.
Step 7	Menu Layout	Interactive 118x236.dp (1:2 ratio) PhoneSilhouettePreview wireframe with tap-to-shake simulation and upright 0° idle rail; Left/Right SegmentedControl; Shake to Swap toggle with inline expandable Knock Sensitivity (Low/Medium/High) selector.
Step 8	Start Mode	First run: Load Demo Mode vs Start from scratch. Replay mode (when accounts > 0): defaults to 'Keep Existing Accounts' / 'Pertahankan Akun Saat Ini' (isKeepExisting=true) alongside Load Demo Data and Reset & Start Fresh.

3.3 Liquid Floating Status Ring Island, SideRail & Shared Components

- Liquid Floating Status Ring Island (SideRail.kt & RailStatusCluster.kt): On root tabs, the 54.dp SideRail houses the Status Ring (battery arc, 4 signal dots, Eye/EyeSlash toggle, and HH:mm clock) at the top. On nested screens (AccountDetailScreen), the Status Ring detaches upward into a floating 54x68.dp glass pill island separated by an animated 10.dp liquid gap, while the main rail header morphs into a CaretLeft Back Button.
- Cobalt Breathing & Ripple Update Halo (SideRail.kt:340-399): When an OTA update is available or ready to install, the Settings gear tab renders a dual-layer animated Cobalt halo (expanding outer sonar ring + breathing inner glow + 1.0->1.08x icon pulse). Tapping Settings while already on Settings opens UpdateSheet in 1 tap.
- Single-Line Auto-Scaling Wave Mask (MaskedAmount.kt): 32ms/digit wave animation into 7 dots (•••••••), optional showSymbol parameter for compact cards, and automatic font scaling (0.82x at >=11 chars, 0.70x at >=14 chars, maxLines=1).
- Live Thousands Separator Input (ThousandsSeparatorVisualTransformation.kt): Formats numeric text fields live as the user types (e.g., 1000000 -> 1.000.000 in ID or 1,000,000 in EN) with bidirectional cursor OffsetMapping while keeping raw digit state pure.

3.4 Primary Screens (7 Screens) & Modal Bottom Sheets (11 Sheets)

Screen / Sheet	Key Features, Telemetry & Interactive Flows (v1.0.28-dev)
DashboardScreen	Total Net Worth hero; 28.dp Safe-to-Spend Today glass card with 64.dp circular % spent gauge, status badge, and Capital Burn-Rate Survival Runway Pill (Flame icon + 'Funds last ~X days (~Y.Z mo at current burn)'); 138.dp Active Accounts carousel with AccountType badge & radial brand haze; Recent Activity; Monthly Budget card.
LedgerScreen	Transactions ('Riwayat Transaksi') with 4 live-count filter pills (All, Expense, Income, Transfer); instant search (notes, EN/ID categories, raw digits); chronological day grouping (TODAY, YESTERDAY, date headers).
AccountsScreen	World Currencies card synced with USD-anchored cross-rates; 24.dp account cards with radial brand color haze, AccountType icon + pill badge (Cash, Bank / Debit, E-Wallet, Credit Card, Savings), % share pill, and spring animateItemPlacement; bottom Thumb-Zone Floating Action Dock ('Reorder' + '+ Add').

Screen / Sheet	Key Features, Telemetry & Interactive Flows (v1.0.28-dev)
AccountDetailScreen	Live-updating single-account view; detached Liquid Status Island + Back Button in SideRail; 2-row Balance Card with unified 'Edit Account' / 'Ubah Akun' pill opening EditAccountSheet; Money In & Money Out tiles; account activity list.
AnalyticsScreen	Last 6 Months Money In / Money Out bar chart; Dual-Mode Monthly Budget Calibrator ('Fixed Limit' vs '% of Total Funds' 1%..100% slider) + Capital Burn-Rate Survival Runway callout card; cycle-filtered Top Spending Categories Donut Chart.
SettingsScreen	9 cards: Language (EN/ID), Main Currency, Monthly Reset Day (1..28), Security & Access (Salted SHA-256 PIN, Biometric, FLAG_SECURE, Lock Now), Sensory & Feedback (USAGE_MEDIA Sound, Haptics, 20:00 Reminder), Menu Position, Weather, Data & Backup (SAF JSON v2 Export/Restore, guarded Replay Guide, Delete All Data), and dedicated App Updates Card (Check for Updates, version badge, What's New).
AppLockScreen	Full-screen lock screen & background privacy veil verifying 4-digit PIN via 10,000-round salted SHA-256 or BiometricPrompt.
11 Modal Sheets	LogTransactionSheet, TransactionEditSheet, NewAccountSheet (42-brand auto-recognition + 5 AccountTypes + 16 swatches + CustomHexColorDialog + live thousands separator), EditAccountSheet (unified name/type/color edit + inline live balance reconciliation + delete guard), ReconcileBalanceSheet, MainCurrencySheet, WorldCurrenciesSheet, WeatherDetailSheet, PinSetupSheet, UpdateSheet (OTA lifecycle), and ReleaseNotesSheet (curated bilingual highlights).

4. Data Architecture, Mathematical Formulas, Security & Test Suite

4.1 Room v4 Schema, Dual-Mode Safe-to-Spend, Survival Runway & OTA Security

```
balance = initialBalance + SUM(INCOME where src=id) + SUM(TRANSFER where dst=id) - SUM(EXPENSE where src=id) - SUM(TRANSFER where src=id)
effectiveBudget = (budgetPercent / 100.0) * max(0, totalNetWorth) [when BudgetMode == PERCENTAGE_OF_FUNDS]
dailyBurnRate = totalCycleSpent / elapsedCycleDays | survivalDays = floor(totalNetWorth / dailyBurnRate)
```

- Room Schema v1 -> v4 Migrations: Non-destructive migrations add initialBalance (v1->v2), accountType with SQL name-based inference for BCA/GoPay/OVO/Tabungan/Credit (v2->v3), and budgetMode + budgetPercent on monthly_plans (v3->v4).
- USD-Anchored Cross-Rate Math (ExchangeRateService.kt): Queries https://open.er-api.com/v6/latest/USD and computes exact cross-rates via rate(from -> to) = usdRates[to] / usdRates[from].
- GitHub OTA In-App Update System (AppUpdateService.kt): Queries GitHub Releases API, parses semantic versions (isNewerVersion), streams APK downloads with progress, re-promotes existing cached APKs on startup, grants explicit URI permissions to OEM installer packages (MIUI/HyperOS/ColorOS/OneUI), and purges stale APKs automatically.
- Full 22-Preference JSON Backup v2 (BackupManager.kt): Exports and restores all accounts (incl. accountType and custom hex colors), transactions, monthly plans (incl. budgetMode and budgetPercent), and 22 preferences.

4.2 Automated Unit Test Suite Status (14 Test Suites, 91 Tests — 100% PASS)

Test Suite	Tests	Verified Assertions & Coverage	Result
AcceptanceCheckTest	7	Build Brief Section 16 acceptance numbers (Rp 18.45M net worth, Rp 150.294/day on Oct 14, 66% ring, Rp 1M expense -> Rp 91.470/day & 79% Near Limit, transfer isolation, knock sensitivity, 7-dot mask).	PASS
AccountTypeTest	4	New in Phase 16: Verifies AccountType.fromKey safe fallback, inferFromName classification across Indonesian & English bank/e-wallet/savings/card names, and BackupManager v2 accountType round-trip.	PASS
AppUpdateTest	4	New in Phase 16: Verifies semantic version comparison (v-prefix, -dev suffix, multi-part versions) and GitHub Release JSON parsing with .apk asset extraction.	PASS
BackupRestoreTest	5	BackupPayload JSON v2 round-trip serialization (all 22 PreferencesBackupDto fields + AccountType + BudgetMode), corrupted JSON failure handling, version <= 0 rejection, and zero-drift recalculation.	PASS
BrandRegistryTest	10	New in Phase 20: Verifies auto-detection across Indonesian banks (BCA, Mandiri, BRI, BNI, Jago, SeaBank, Jenius), e-wallets (GoPay, OVO, DANA, ShopeePay), global brands (Wise, PayPal, Revolut), and custom #RRGGBB hex parsing.	PASS
CategoryDetectorTest	9	Keyword detection across categories plus word-boundary negative tests confirming 'theater'/'sweater', 'chair'/'repair', and 'cost' do not trigger false positives.	PASS
CurrencyConverterTest	7	Same-currency identity, USD <-> IDR decimal scaling (2 vs 0 decimals), EUR -> JPY cross-rates, and missing-rate fallback.	PASS

Test Suite	Tests	Verified Assertions & Coverage	Result
HostAllowlistTest	3	Verifies HostAllowlistInterceptor permits the 6 allowed hosts (Open-Meteo, ExchangeRate-API, GitHub Releases/CDN) and throws SecurityException on unauthorized domains.	PASS
LedgerIntegrityTest	5	Zero-drift derivation on retroactive edits/deletes, atomic transfer conservation, manual balance reconciliation delta math, backdating, and initialBalance currency conversion zero-drift.	PASS
PinSecurityTest	5	Verifies saltHex:hashHex format (32:64 hex chars), per-call salt randomness, 10,000-round salted verification, legacy 64-hex unsalted fallback, and malformed hash safety.	PASS
SafeToSpendTest	16	Leap-year February, status thresholds, custom cycleStartDay, cross-month startingSpent, PERCENTAGE_OF_FUNDS budget calculation, 100% full-runway allocation, and Capital Burn-Rate Survival Runway math.	PASS
SignalStrengthHelperTest	3	Monotonic translation of 4-bar and 5-bar cellular signal scales into 4 UI dots.	PASS
ThousandsSeparatorTest	5	New in Phase 22: Verifies Indonesian dot grouping, US comma grouping, empty/short strings, decimal preservation, and bidirectional cursor OffsetMapping.	PASS
WeatherIconMapperTest	8	WMO weather code mapping across day/night variants to Phosphor icons.	PASS

5. Audit Findings Resolution Ledger & Residual Observations

5.1 Resolution Ledger of Initial Audit v1.0 Findings (16 / 16 Resolved)

ID	Severity	Initial Finding Summary	Resolution Status & Verification
CRITICAL-1	Critical	changeMainCurrency() omitted acc.initialBalance conversion.	**RESOLVED (Phase 10) — Converts initialBalance + recalculates all balances; verified in LedgerIntegrityTest.**
HIGH-1	High	Stale selectedAccount snapshot on AccountDetailScreen.	**RESOLVED (Phase 10) — Dynamically resolved from rawAccounts in MainViewModel.uiState.**
HIGH-2	High	AccountsScreen ignored selectedWorldCurrency & used IDR fallback.	**RESOLVED (Phase 10 & 22) — Synced with selectedWorldCurrency & USD-anchored FX rates.**
HIGH-3	High	Weather 'Off' (not_now) still showed fake 24°C Sun in GreetingBar.	**RESOLVED (Phase 11) — Hides widget when Off; shows Thermometer + '--' when pending.**
HIGH-4	High	startingSpent dropped to 0 mid-cycle when cycleStartDay > 1.	**RESOLVED (Phase 10) — Matches plan.monthKey against cycleMonthKey; verified in SafeToSpendTest.**
MED-1	Medium	Substring false positives in Category.detectFromNote.	**RESOLVED (Phase 11) — Pre-compiled word-boundary regex (\b); verified in CategoryDetectorTest.**
MED-2	Medium	Budget Slider spammed DB writes & chimes on every drag frame.	**RESOLVED (Phase 11) — Buffered locally in sliderBudget; commits onValueChangeFinished.**
MED-3	Medium	SALARY hidden in LogTransactionSheet; manual category/accent overwritten.	**RESOLVED (Phase 11) — Type-aware category list, manual category preservation, accent retention.**
MED-4	Medium	Unsalted SHA-256 PIN hashing in UserPreferencesRepository.	**RESOLVED (Phase 12) — 10,000-round salted SHA-256 + SecureRandom; verified in PinSecurityTest.**
MED-5	Medium	Incomplete Bahasa Indonesia ('in') localization across UI/toasts.	**RESOLVED (Phases 12-25) — Full bilingual copywriting, ReleaseNotesSheet, & reactive tooltips.**
LOW-1..6	Low	Backup prefs, Daily Reminder scheduler, haptics/chime gating, DST/New Year dates, dead code.	**RESOLVED (Phases 10-12) — 22-pref backup v2, 20:00 AlarmManager scheduler, haptics checks, DST rounding.**

5.2 Residual Minor Observations in v1.0.28-dev (Low Priority)

- OBS-1 (EditAccountSheet.kt:409-424): NewAccountSheet.kt:283 applies ThousandsSeparatorVisualTransformation(useDotSeparator) to the initial balance input field, whereas the inline balance adjustment field in EditAccountSheet.kt:409-424 currently renders raw unformatted digits while typing. Adding ThousandsSeparatorVisualTransformation to EditAccountSheet will make both sheets identical.
- OBS-2 (ReconcileBalanceSheet.kt & ActiveSheet.RECONCILE_BALANCE): Following the Phase 24 unification of balance editing into EditAccountSheet.kt, ActiveSheet.RECONCILE_BALANCE and ReconcileBalanceSheet.kt are no longer triggered from any UI button and can be retired in a future cleanup.
- OBS-3 (AndroidManifest.xml:42-49): DailyReminderReceiver is declared with android:exported="true". Since DailyReminderScheduler uses an explicit component intent, setting android:exported="false" prevents third-party apps

from spoofing reminder broadcasts while still receiving BOOT_COMPLETED and AlarmManager intents.

- OBS-4 (MainAppScaffold.kt:515 & MainCurrencySheet.kt): Selecting a world currency in MainAppScaffold.kt:515 calls showToast("Currency changed to $code") instead of strings.currencyChangedToast.format(code), and MainCurrencySheet.kt confirmation dialog strings remain in English.
- OBS-5 (app/build.gradle.kts:41-48): Release build type uses sharedDebug keystore and isMinifyEnabled = false so local studio builds and GitHub Release OTA APKs share the same signature during development; switch to a production release keystore and enable R8 before Play Store distribution.
- OBS-6 (ui/preview/*): Historical Phase 2–3 preview composables (FoundationPreviewScreen.kt, Phase3ComponentsScreen.kt) remain unreferenced in main source sets.
